

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

Address:NO. 3, Yanhe Road, Boshan, Zibo, Shandong, China
Email:wp@cnjingganrefractory.com/sdwenping@163.com
Contact:Rose Tel/Wechat:+86-13275332819
Tel:86-533-4188518 Fax:86-533-4188518

Kaolin Brick

1,Description of Kaolin brick:

Kaolin Brick is mainly made of high-quality kaolin with low iron and high aluminium. It is produced by pouring and ramming molding method. The product has low iron oxide content ($\leq 1.5\%$), low porosity ($\leq 18\%$) and high compressive strength ($\geq 50\text{Mpa}$). Therefore, the product has high compactness and good corrosion resistance, and is well applied at the bottom of glass furnace.

2,Index of Kaolin brick:

Item	JJN-40	JJN-60
Al ₂ O ₃ %	>40	>60
Fe ₂ O ₃ %	≤ 1.5	≤ 1.6
Refractoriness under load KD, °C	1400	1450
Reheating Linear Change %, 1400°C*3h	0~-0.4	0~-0.2
Apparent porosity %	18	18
Cold crushing strength Mpa	>50	>60

3,Product characteristics:

(1),Kaolin Brick is shaped by vibration tamping method. After sintering,Kaolin Brick is compact and the porosity is low.In order to ensure that the cracks of the products after masonry are as small as possible,the products must be machined before shipment,and all the surfaces must be grinded smoothly. The products are widely used in the bottom of glass furnace.

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

(2),Product Specification: JJN-40, JJN-60,two Kinds of Brick Types with and without Grooves.

(3),Product knowledge: Qualified products must be grinded flat by a grinder after cutting, 4 or 6 surface grinding (according to user requirements), so that the size of bricks can be kept accurate, and the mortar joints can be maintained ≤ 0.5 mm after masonry, thus ensuring the service life of bricks in the process of use,Qualified products after processing must be pre-numbered before packaging and shipment to facilitate on-site construction.

(4),Our company has been producing and supplying kaolin brick for more than ten years. The product quality is superior and the company's reputation is excellent. After receiving the order, the products are manufactured and supplied according to the requirements of the users. The packing of the products is compact and firm, which ensures that the users of the products are intact and intact.

(5),Product packaging is completely based on the shape, size and size of the product, choose a reasonable way, the purpose is to make the product after packaging intact, safe transportation.

4,Product packaging:

use safe, firm and moisture-proof packing suitable for land and sea transportation

5,Our service:

- 1)Provide free technical advice for users
- 2)Free for users to provide product application description
- 3)Free for users to provide product configuration design scheme
- 4)Free for users to provide sample,for user testing

6,Our advantages:

1)Professional,with more than 20 years of refractory production and operation, stronger technical exchanges and services

2)We have our own Refractory material product production cooperation factory

3)We have our own Graphite Electrode product production cooperation factory

7.Good feedback of product use effect,the products have been exported to Pakistan, Russia, Australia, Morocco and India.

8.We are a professional supplier, who can provide customers with free product technology, use and other issues.

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
